

10th Annual CCTS BIOETHICS FORUM

Hosted by Tuskegee University

AI in Action: Navigating Ethics and Opportunities in Healthcare and Public Health Practices

Join us for the **10th Annual CCTS Bioethics Forum** where we delve into the transformative role of Artificial Intelligence (AI) in contemporary healthcare and public health practices. Building on last year's exploration of AI in translational healthcare research, this year's discussion will focus on the practical applications of AI technologies currently implemented in medicine and public health. We aim to highlight the positive impacts of AI systems used in healthcare and public health while addressing key ethical concerns, such as data privacy and security, algorithmic discrimination, accountability, explainability, and fair AI assurance.

 **Wednesday, Feb. 19, 2025**

 **8:30 AM - 3:30 PM**

 **Auburn Marriott Opelika Resort & Spa at Grand National, Opelika, AL**

Forum Host:

Stephen Olufemi Sodeke, PhD; MA, DBE
Resident Bioethicist, Center for Biomedical Research
Professor of Bioethics and Allied Health Sciences
Tuskegee University

Keynote Speaker:

Francesca G. Weeks, DrPH MCHES
Assistant Research Scientist
The Health, Environmental and Economic Justice (T.H.E. E.J. Lab)
Maryland Center for Health Equity, MCHE
School of Public Health; University of Maryland

Together, we will foster a dialogue on how to maximize the benefits of these innovations while proactively mitigating potential risks. Attendees will gain insights into the current landscape of healthcare and public health AI uses, our challenges, and collaborative strategies for creating a safer, more equitable AI-driven future for all stakeholders.
