## CONFOCAL RE-IMAGINED

### Seminar: GET CLOSER TO THE TRUTH

Confocal Imaging with  
TauSense Lifetime Tools

10am Feb. 12th, Shelby  
Room 105

Join our workshop to Get Closer to the Truth with STELLARIS. During this seminar, you will have the opportunity to interact with Leica Microsystems imaging experts and learn how STELLARIS gives you power to see more, potential to discover more, and productivity to do more.

To publish cutting-edge research, you need to be able to see more, to try novel applications and to be able to collect reliable data. Our mission is to be your partner in microscopy and to empower you to drive progress in science. With the STELLARIS confocal platform, we have re-imagined confocal microscopy to get you closer to the truth when conducting research.

**PRESENTED BY:**  
Chris Ott, Advanced  
Workflow Specialist,  
Leica Microsystems

**HOSTED BY:**  
UAB High Resolution  
Imaging Service Center

**TRAINING SESSIONS:**  
Feb. 12-13th

## POWER SEE MORE

The synergy between the next generation of Power HyD detectors, the completely optimized beam path, and the unique White Light Laser gives you perfected imaging performance.

## POTENTIAL DISCOVER MORE

Gain access to functional imaging thanks to TauSense, a revolutionary set of imaging modes, including TauContrast, TauGating, and TauSeparation, based on fluorescence lifetime.

## PRODUCTIVITY DO MORE

ImageCompass is a completely new smart user interface. Setting up complex experiments is now significantly easier and more intuitive than ever before.
