

## MRI Safety Declination

---

Patient Name: \_\_\_\_\_

Date: \_\_\_\_\_

Magnet Resonance Imaging, (MRI), is an imaging method that uses magnetic field images of human anatomy and pathology. Because of the strength of the magnetic field used in this study, you will be screened prior to your exam. All metallic items must be removed before you may enter the MRI scan room.

You have chosen not to wear the apparel provided for you by our facility. In your particular case, you have increased the risk of the following condition(s).

**The risks among others include:**

Heating

Migration

Compromised Exam Quality

Other

---

By signing below you are declining to adhere to our MRI Safety Policy & Procedure. You are requesting that the Radiologists, Technologists and others proceed with performing and acquiring this examination on you.
