

Structural Biology Forum

UAB THE UNIVERSITY OF
ALABAMA AT BIRMINGHAM.

Md. Mohasin, Ph.D.

Variability in Capsular Polysaccharide Secondary and Tertiary Structure directly influence *Streptococcus pneumoniae* interactions with the host

Department of Microbiology, UAB

Feroze Ganaie, Ph.D.

Discovery of a novel pneumococcal capsule type 33E that has emerged from vaccine type 33F and may evade vaccine induced immunity

Department of Medicine, UAB

November 13, 2024
11:45 am–1:00 pm
BBRB 170

The UAB Structural Biology Forum (SBF) brings together specialists and non-specialists in structural biology to promote collaborative structure–function research in diverse disciplines including infectious diseases, cancer, immunology, cell biology, drug discovery and design, cell biology, and microbiome/metabolomics.

Refreshments will be served. For more information, please contact Dr. Jamil Saad (saad@uab.edu)
