

Do you have **Sickle Cell Trait** or Do you know someone that has **Sickle Cell Trait**?

We are looking for participants for a research study to help us understand how to better care for people with sickle cell trait!

Who: Anyone (18 - 65) who **knows they have or suspects that they have Sickle Cell Trait (SCT)** and are willing to get tested to confirm their SCT status (we would provide the study-related **test at no cost**).

What: If you are confirmed to have SCT (finger prick test), you will participate and **3 short in-person study visits** (each 1 year apart). During each visit, you will fill out a questionnaire (15-20 min), get labs (blood/urine) and vital signs done **at no cost**.

Where: Fill in your site contact details here

When: If you have a friend or family member that comes to the Name of Clinic at Site Contact Name, you can come in next time they have an appointment. Or, **we can schedule you for a time that is convenient for you**.

Purpose: Your invaluable participation will be used to create the **1st large registry of people with SCT**. The information we learn from this study may help us develop targeted treatments and screening standards for people with SCT in the future.

Compensation: You will get a \$10 gift card for your eligibility test. If you have SCT, you will get a \$25 gift card for each study visit (\$75 total).

Contact: Lauren Mullis, contact the study coordinator for additional information at:

- **205-934-2049**
- **Email of Study Coordinator: lmullis@uabmc.edu**

This study is being done at multiple sites. The information of your local participating site is:

- Site: University of Alabama at Birmingham
- Site Principal Investigator: Dr. Julie Kanter

Central IRB Protocol #: Pro00066873

The Lead Study Investigators are:

Rakhi Naik, MD, MHS
Johns Hopkins University

Julie Kanter, MD
University of Alabama Birmingham
