PACKAGING PROCEDURES FOR MEDICAL WASTE DISPOSAL

Using Stericycle Reusable Containers

EXAMPLES

LINE CONTAINER WITH RED BAG

TIE BAG WHEN CONTAINER IS FULL

Step 1

Step 2

Step 3

Step 4

UNACCEPTABLE

Secure Lid on Container
- Ensure all closure and/or locking mechanisms are engaged

Check Markings
- Federal markings (see picture above)
- Additional state regulations may apply, see Stericycle representative
- Apply bar code label where available

Regulatory Requirements

General
- Generators are responsible for packaging their wastes.
- Each bag must be hand tied by gathering and twisting the neck of the bag and using a tie or hand knot to secure the bag, and each container must be securely closed.
- Closed bags must not be visible once secondary container is closed.
- Improperly packaged containers or damaged containers will be denied pick-up or returned to the generator.
- Only Regulated Medical Waste can be placed in Stericycle containers.

Sharps
- Sharp materials ("sharps") must be placed in a puncture-resistant container designed for "sharps" waste. "Sharps" include needles, syringes, broken glass, scalpels, culture slides, culture dishes, broken capillary tubes, broken rigid plastic and exposed ends of dental wires.
- All sharps containers should be properly closed before being placed into secondary containers.
- No loose sharps are permitted outside of sharps containers

For information, contact your Stericycle Sales Representative or Customer Service at (866) 783-7422.

* Not applicable for reusable sharps containers.
** For large or bulk reusable containers (greater than 119 gallons), bag must meet and be marked per current ASTM requirements, limited to a maximum 46 gallons and 22 lbs.

The information on the poster is based on current federal laws and regulations. Additional state-specific regulations may apply. Please be advised that regulations are subject to change.
