The EPA Environmental Peer Audit Will Be
March 30 – April 4
Please Manage Aerosol Cans Properly
(They Will Even Look In The Trash)

✓ Empty aerosol spray cans, that contain no product and nothing comes out when the spray valve is pressed, may be discarded in the regular trash.

✓ Aerosol spray cans that are not emptied completely must be manifested as hazardous waste. (Call OH&S 934-2487 to learn more)

✓ Please do not attempt to puncture or crush aerosol spray cans, this could cause personal injury.

May We Also Suggest …
✓ Choose a non-aerosol pump applicator that could be refillable.
✓ Purchase according to demand so that the product’s shelf life does not expire.
✓ Determine whether or not a product is even needed. Could the process using the aerosol be eliminated?
✓ Use only as much as is needed.
✓ Store aerosol containers away from moisture, sunlight, and extreme heat or cold.
✓ Follow the label instructions to clean the nozzle after each use.
