The UAB Department of Occupational Health and Safety will conduct a Laboratory Safety Workshop on Tuesday, June 23rd from 8:00 AM to 4:00 PM in the CH19 building. The workshop will be an interactive action-learning experience consisting of a series of exercises designed to help participants acquire the skills needed to deal with specific laboratory health and safety issues.

Hands-on exercises will cover the following:

- Laboratory emergency management and emergency preparedness
- How to use and maintain personal protective equipment
- Proper use of a biological safety cabinet
- How to clean up a biohazardous spill
- Proper use of a chemical fume hood
- How to clean up a chemical spill
- How to safely remove contaminated gloves
- Chemical waste management procedures
- Management of satellite accumulation areas
- Procedures for the safe transport of biohazards on campus
- Medical/Biomedical/Biohazardous waste management
- Emergency evacuation procedures

There are training prerequisites for this workshop. Please go to Workshop Training Prerequisites (http://www.uab.edu/ohs/training/research-training/173-lab-safety-workshop) for a list of the required courses.
